**20a. How does the Committee accomplish its purpose?**

The scope and objectives are to advise the National Science Foundation (NSF) on the merit of proposals requesting financial support of research and research-related activities. The panel will review proposals submitted to NSF under the purview of the Division of Ocean Sciences (OCE). The duties and responsibilities are to review and evaluate proposals, which may include site visits, and provide written recommendations on proposals as part of the selection process for awards.

**20b. How does the Committee balance its membership?**

Members are selected to be representative of the scientific areas encompassed by OCE activities. Every effort is made to achieve a diverse membership with representation including individuals from underrepresented groups and different geographic regions.

**20c. How frequent and relevant are the Committee Meetings?**

Estimated Number of Meetings per Year - 20 Total Meetings - 25

**20d. Why can't the advice or information this committee provides be obtained elsewhere?**

This committee is essential because the broad scientific base represented by the division transcends the ability of NSF staff to evaluate proposals thoroughly so that outside advice from practicing scientists is essential both for fair peer evaluation of proposals and for

effective scientific long-range planning. The essence of the peer review system is that those scientists most knowledgeable about a field be the judge of the worthiness and importance of a proposal in the field. This requires the division to consult with many members of the scientific community to insure fair and reasonable evaluation of a proposal.

## **20e. Why is it necessary to close and/or partially closed committee meetings?**

These meetings are closed because the proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

## **21. Remarks**

### **Designated Federal Officer**

Terrence M Quinn Division Director

### Narrative Description

The NSF mission is set out in the NSF Act of 1950 authorizes and directs the Agency to initiate and support: basic scientific research and research fundamental to the engineering process; and science and engineering education programs at all levels and in all fields of science and engineering. The involvement of knowledgeable peers from outside the Foundation in the review of proposals is the keystone of NSF's proposal review system. Their judgments of the extent to which proposals address the merit review criteria are vital for informing NSF staff and influencing funding recommendations.
